

## **MGR Wether Programs**

MGR has developed two wether programs (Market and Platinum) for our MGR sanctioned shows. Each program has a different scorecard and both are currently available to purebred MGR registered wethers. Each owner needs to study the scorecards and then determine which program they want to compete in based on their wether's body type. Each wether may compete in only one program. Owners are free to exhibit additional wethers in the other program, the goats may not move back and forth.

### **MGR Market Wether Program**

This program is designed to select animals that are produced to create choice cuts of meat. Their body style displays good length and depth of loin with heavy muscle. Market animals are considered terminal (meat production) and may be shown until their first permanent tooth erupts. As soon as an adult tooth becomes visible, market wethers must retire from the show ring.

### **MGR Platinum Wether Program**

This program is designed to allow wethers who are not designated to become a product in the freezer to compete. They are judged on breed character, correct structure, balance, disposition, and as an example of how a successful breeding program is progressing. They allow people of all ages to participate in showing and they are FUN! They learn tricks, drive, visit nursing homes and schools, create pandemonium on the farm, and are best friends to their owners and to other members of the herd. These "Ambassadors of the Breed" help spread the word about how much fun a person can have with a Myotonic Goat.
